

DAY 2 — Dataset Collection

Task

Collect job descriptions from publicly available datasets.

Recommended fields:

job_id, job_title, company, location, job_description ,experience, education, salary ,job_type

job_description

For skill extraction, the most important column is:

job_description

How to complete

They should:

1. Find a suitable public dataset.
2. Download CSV/JSON.
3. Inspect number of records.
4. Identify missing values.
5. Identify duplicate jobs.
6. Check text length.
7. Identify relevant columns.

Python example

```
import pandas as pd
df = pd.read_csv("jobs.csv")
print(df.shape)
print(df.columns)
print(df.head())
print(df.isnull().sum())
```

Deliverable

raw_jobs.csv

and

dataset_analysis.ipynb
